CAREER ASPIRATION

AWS & DevOps Engineer with practical project experience across AWS (EC2, S3, IAM, VPC), Docker, Kubernetes, Jenkins, Git, and Terraform. Built and deployed a complete CI/CD pipeline and containerized Kubernetes workloads independently. Seeking an entry-level DevOps/Cloud Engineer role to apply automation and infrastructure skills in a production environment.

INTERNSHIP EXPERIENCE

Web Development Intern — Sand Bird Research and Development Pvt. Ltd. *(26 Jun 2025 – 25 Jul 2025)*

- Built and tested new front-end features for the M Square Real Estate platform during a 1-month hands-on web development internship.
- Identified and fixed page responsiveness issues, improving load performance; collaborated using Git for version control in an agile team.

EDUCATION

B.Sc. Computer Science with AI — Jeppiaar College of Arts and Science, Chennai
2023 – 2026 | Percentage: 70.63%

TECHNICAL SKILLS

Cloud (AWS): EC2, S3, IAM, VPC, EBS, EFS, Route 53, Elastic Load Balancer (ELB), Auto Scaling, CloudWatch

DevOps Tools: Docker, Kubernetes, Jenkins, Git, GitHub, Terraform

Operating Systems: Ubuntu, Amazon Linux

Networking: TCP/IP, DNS, HTTP/HTTPS, SSH, VPC, Subnets, Security Groups

Programming & Web: Python, Java, HTML, CSS, JavaScript

PROJECTS

Automated CI/CD Pipeline Using AWS, Jenkins, and Docker

- Designed and built an end-to-end CI/CD pipeline on AWS EC2 using Jenkins, Docker, Git, and GitHub, automating build, test, and deployment stages.
- Automated deployment steps with shell scripting, cutting manual release effort and reducing deployment time.

Self-Learning Mobile Security System (Face Detection & Behavioural Analysis)
Tools: Python, Flutter, OpenCV, Google ML Kit, AI/Face Detection

- Built a mobile security application combining face detection and behavioural analysis to flag unauthorized access attempts, using Python, Flutter, OpenCV, and Google ML Kit.

Kubernetes Application Deployment

- Deployed and managed containerized applications on Kubernetes using Deployments, ReplicaSets, Services, and Ingress.
- Implemented rolling updates, namespace isolation, and health checks to ensure zero-downtime releases.

CERTIFICATIONS

- Basic Python — Infosys Springboard
- Object-Oriented Programming Using Python — Infosys Springboard
- DevOps Fundamentals — IBM
- AWS Cloud & DevOps Training
